

## WHAT IS IT?

Hoxell is a digital solution that provides seamless communication between departments. Hotel team members can manage guest service requests and communicate more efficiently utilizing Hoxell instant messaging.

Through the Hoxell Manager Dashboard, hotel leaders can access real-time reports, logs, and statistics for each department which allows them to track costs, efficiency, and productivity.

Hoxell is a hosted browser-based solution that is accessible from any device, anytime, anywhere for managing guest requests, minibar consumption (for tracking only, there is no POS integration), managing lists for F&B (for example for breakfast handling).
